Title: UNIDENTIFIED POWDER LETTER
SENATOR ARLEN SPECTER-VICTIM
02/09/2009
WMD

Synopsis: Report on response to powder letter received at the offices of Senator Arlen Specter and opening of a case.

Details: On February 9, 2009, at approximately 1:00 p.m., FBI Pittsburgh was notified of the receipt of a letter containing an unidentified white powder at the office of Senator Arlen Specter, located at 425 Sixth Street, Suite 1450, Pittsburgh, PA 15219.

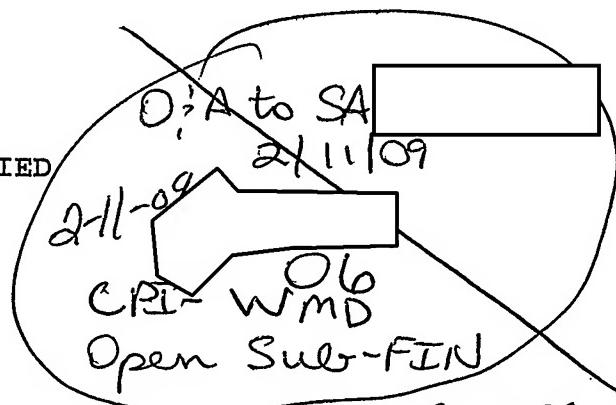

Responding agencies included City of Pittsburgh Fire, City of Pittsburgh Hazmat, City of Pittsburgh Police, Federal Bureau of Investigation, and U.S. Postal Inspectors. *BS 1/2*

The letter had been handled by a secretary in Senator Specter's office, and a small amount of a white unidentified substance fell from the envelope. At this time, the envelope was placed in a plastic bag and moved to an unoccupied room within the suite of offices. Above-captioned agencies responded and identified the addressee as:

Sen. Arlen Specter [sic]
425 Sixth Ave.
Pittsburgh, Pa, 15219

279B-PG-77757-1

UNCLASSIFIED

To: Pittsburgh From: Pittsburgh
Re: 279B-PG-, 02/11/2009

The listed return address was:

America On The One
5572 Penn Ave.
Pittsburgh, Pa. 15206

The return address was identified by the city of Pittsburgh Police dispatch as a nonexistent address. The letter was postmarked from Pittsburgh, PA, on February 7, 2009. The envelope and letter were handwritten.

The language of the enclosed letter read as follows:

"Arlen
Get out of Government;
or you will be removed.

Thank you,
America"

A WMD Threat Assessment conference call was conducted by the WMD Coordinator with WMDOU and HMRU prior to any collection or testing being performed.

Approximately three tablespoons of an unidentified white powder was enclosed in the business-size envelope. The letter was field-screened with a multi-Rae tool and a Ludlum device. Readings for both tools were consistent with background readings. An infrared device reading resulted in a presumptive identification of the powder as 95.1 percent sweetener, dextrose or saccharin. A Bio-system check was negative for the existence of proteins, and pH readings were neutral. As such, the letter was deemed safe for transport.

Personnel within Senator Specter's office were requested by U.S. Capitol Police to stay on site until the field screening and testing of the powder was complete. Office personnel were provided a briefing by the WMD Coordinator concerning the initial field test results of the unidentified white powder. No recent threats or similar mailings had been previously received in the office. The office employee who had opened the letter did not experience any medical symptoms or reaction to the powder.

UNCLASSIFIED

UNCLASSIFIED

To: Pittsburgh From: Pittsburgh
Re: 279B-PG-, 02/11/2009

b6
b7c

The letter and unidentified white powder were overpacked and provided to FBI WMD Coordinator SA [redacted] for transport to the appropriate Laboratory Response Network Facility in Lionville, PA. A copy of the envelope and letter are attached to this communication.

Pittsburgh Division Hazardous Materials Response Team members drove the evidence to the Pennsylvania State Department of Health Laboratory Response Network (LRN) on 02/10/2009 for further testing. Initial results received indicate that the powder is negative for the multi panel PCR tests and negative for ricin on the Time Results Fluorescence (TRF) anti-body test. Results for the multi panel culture testing is expected in the next few days. Notifications will be provided to the appropriate persons upon completion of all testing.

An Urgent Report to the Director, SIOC and CT Watch dated 02/09/2009 was prepared and issued on this incident.

Writer requests this case be opened and assigned.

Title: UNIDENTIFIED POWDER LETTER
SENATOR ARLEN SPECTER-VICTIM
WMD

Synopsis: Submission of EC for late entry of evidence.

Details: Evidence for this case was acquired on February 9, 2009 at the Pittsburgh Offices of Senator Arlen Specter located at 425 Sixth Avenue, suite 1450, Pittsburgh, PA 15219. The nature of this hazmat evidence requires that it be delivered directly to the state Laboratory Response Network (LRN) facility located in Lionville, PA for testing. All tests were returned as negative for a bioterrorism agent and the evidence was returned to Writer on May 4, 2009. Writer was unable to place the evidence into the evidence room until it was returned.

POWDER THREAT LETTER
OFFICE OF SENATOR ARLEN SPECTER-
VICTIM
279B-PG-NEW**Purpose/Synopsis:** TERRORIST INCIDENT/THREAT**INITIAL
URGENT REPORT**

On February 9, 2009, at approximately 1:00 p.m., FBI Pittsburgh was notified of the receipt of a letter containing an unidentified white powder at the office of Senator Arlen Specter, located at 425 Sixth Street, Suite 1450, Pittsburgh, PA 15219.

Responding agencies included City of Pittsburgh Fire, City of Pittsburgh Hazmat, City of Pittsburgh Police, Federal Bureau of Investigation, and U.S. Postal Inspectors.

The letter had been handled by a secretary in Senator Specter's office, and a small amount of a white unidentified substance fell from the envelope. At this time, the envelope was placed in a plastic bag and moved to an unoccupied room within the suite of offices. Above-captioned agencies responded and identified the addressee as:

Sen. Arlen Specter [sic]

Re: 02/09/2009

The return address was:

America On The One
5572 Penn Ave.
Pittsburgh, Pa. 15206

The return address was determined to be a nonexistent address. The letter was postmarked from Pittsburgh, PA, on February 7, 2009. The envelope and letter were handwritten.

The language of the enclosed letter read as follows:

"Arlen
Get out of Government;
or you will be removed.

Thank you,
America"

A WMD Threat Assessment conference call was conducted with WMDOU and HMRU prior to any collection or testing being performed.

The letter was field-screened with a multi-ray tool and a Ludlum device. Readings for both tools were consistent with background readings. A sealed infrared reading resulted in a presumptive identification of the powder as 95.1 percent sweetener, dextrose or saccharin. A Bio-system check was negative for the existence of proteins, and PH readings were neutral. Approximately three tablespoons of an unidentified white powder was enclosed in the business-size envelope.

Personnel within Senator Specter's office were provided a briefing by FBI Hazmat personnel concerning the initial field-test results of the unidentified white powder.

b6
b7C

The letter and unidentified white powder were overpacked and provided to WMD Coordinator SA [redacted] for transport to the appropriate Laboratory Response Network Facility in Lionville, PA.

Letter sent to Specter's office here not a danger

The U.S. Postal Service said a suspicious letter sent to Sen. Arlen Specter's Pittsburgh office is not dangerous.

The letter containing a white powdery substance was received yesterday at Mr. Specter's office Downtown.

Mr. Specter's office said a staffer opened the suspicious letter about noon. Pittsburgh police, the FBI and a hazardous materials team responded to the call about the powdery substance. The U.S. Postal Service said the substance turned out to be a food product.

DOWNTOWN

Powder sent to Specter believed to be harmless

Preliminary indications are that a suspicious, powdery, white substance found Monday in a threatening letter mailed to Sen. Arlen Specter's office in the Regional Enterprise Tower on Sixth Avenue, Downtown, was not hazardous.

Staffers were not evacuated after the letter, which contained what a Specter spokeswoman called "a nonspecific threat," was received about 12:30 p.m. City police, the FBI, a hazardous materials crew and postal inspectors were called as a matter of protocol, the spokeswoman said.

More comprehensive tests will be conducted on the powder to determine exactly what it is. Investigators are trying to determine who sent the letter.

Title: UNIDENTIFIED POWDER LETTER
SENATOR ARLEN SPECTER-VICTIM
02/09/2009
WMD

Synopsis: Placement of Field Screening Matrix and Lab Report documentation to file.

Details: A completed FBI Field Screening Matrix verifies that the product accompanying the letter to Senator Specter was field screened by US Postal Inspector [REDACTED] using the Multi Rae, pH Paper, Ludlum, Biocheck and Hazmat ID Infrared reader. No readings of significance were observed and the product was packaged and identified as safe for transport.

b6
b7C

A copy of the completed FBI Field Screening Matrix accompanied the product to the Pennsylvania Department of Health (PADOH) Laboratory Response Network (LRN) and the original is attached to this communication.

PADOH LRN lab telephoned Writer as lab results were obtained and indicated negative results for testing by PCR, culture and TRF. Presence of Francisella tularensis, yersinia pestis, bacillus anthracis, Burkholderia, variola virus or ricin was not detected.

The original notices received from the PADOH LRN with lab results are attached to this communication for reference.

Synopsis: Submission of EC for late entry of evidence.

Details: Evidence for this case was acquired on February 9, 2009 at the Pittsburgh Offices of Senator Arlen Specter located at 425 Sixth Avenue, suite 1450, Pittsburgh, PA 15219. The nature of this hazmat evidence requires that it be delivered directly to the state Laboratory Response Network (LRN) facility located in Lionville, PA for testing. All tests were returned as negative for a bioterrorism agent and the evidence was returned to Writer on May 4, 2009. Writer was unable to place the evidence into the evidence room until it was returned.

Synopsis: To submit a letter, envelope, and unidentified white powder received by Senator Arlen Specter for all appropriate laboratory examinations.

Package Copy: Being forwarded under separate cover are the following items:

One plastic storage bag containing white powder from letter. One plastic storage bag containing an envelope and an additional plastic storage bag containing a written letter.

Details: On February 9, 2009 FBI Pittsburgh was notified of the receipt of a letter containing an unidentified white powder at the office of Senator Arlen Specter located at 425 Sixth Street, Suite 1450, Pittsburgh, PA 15219. The letter had been handled by a secretary in Senator Specter's office when the white substance was observed. Approximately three tablespoons of an unidentified powder was enclosed in the business-size envelope. An FBI Hazardous Materials Response Unit Field Screening Matrix was performed on the product accompanying the letter and did not yield readings of significance. The product was also analyzed by the Pennsylvania Department of Health (PADOH) Laboratory Response Network (LRN). Lab results obtained indicated negative results for testing by PCR, culture and TRF. Title: UNIDENTIFIED POWDER LETTER
SENATOR ARLEN SPECTER-VICTIM
WMD

Date specimens received: October 22, 2009

The items listed below were received in the Chemistry Unit:

- Q1 Envelope addressed to Sen. Arlen Specter (1B1, E4336666)
- Q2 Page beginning "Arlen Get out of Government;..." (1B1, E4336666)
- Q3 Unknown substance (1B1, E4336666)

This report contains the results of the chemical examinations.

Results of Examinations:

Specimen Q3 was a white solid powder that was consistent with mainly containing glucose. Additionally, saccharin was identified as a minor component within the Q3 powder. The combination of glucose (i.e., dextrose) and saccharin can be found in food supplements and artificial sweeteners (e.g., Sweet 'N Low).

Specimens Q1 and Q2 were not analyzed.

279B-PG-77757-11

The following techniques were used in the analysis of Q3: visual inspection, weighing, stereomicroscopy, Fourier-transform infrared spectrophotometry, gas chromatography/mass spectrometry, and time-of-flight mass spectrometry.

Remarks:

The final disposition of the evidence will be the subject of a separate communication.

Title: UNIDENTIFIED POWDER LETTER
SENATOR ARLEN APECTER-VICTIM
WMD/HMRT

Synopsis: Payment of undercover credit card fee.

Details: It is requested the attached FD-794 be approved for the yearly one time fee of \$35 for my undercover credit card.

Lab No.: 091022006 PO HB

Reference: Communication dated October 20, 2009

Your No.:

Title: UNIDENTIFIED POWDER LETTER
SENATOR ARLEN SPECTER-VICTIM
WMD

Date specimens received: October 22, 2009

The following specimens were received in the Questioned Documents Unit on July 9, 2010:

- Q1 Envelope addressed to Sen. Arlen Specter (1B1, E4336666)
- Q1.1 Stamp removed from Q1 (1B1, E4336666)
- Q2 Page beginning "Arlen Get out of Government;..." (1B1, E4336666)

This report contains the results of the questioned document examinations.

Results of Examinations:

No indented writing or watermarks were observed during the examination of Q1 and Q2 which might indicate their immediate source(s).

The Q1 envelope flap and stamp are manufactured to be self-adhesive.

Information from the submitted specimens was searched in the Anonymous Letter File with negative results. Appropriate entries have been added for future reference.

Downloaded

279B-PG-77757-15

The handwriting on specimens Q1 and Q2 may be suitable for comparison. If handwriting examinations are requested in the future it is suggested that comparable dictated and undictated known writing from any logical suspect(s) be obtained and submitted to this Laboratory. The dictated known writing should contain the same wording and format as the questioned writing. As each exemplar is completed, it should be removed from the writer(s) view. A sufficient quantity of exemplars should be obtained to account for natural variation in the writing. Undictated known writing is prepared during the normal course of business activity and may include personal correspondence, applications, and greeting cards.

Additional assessments and observations have been recorded for future reference.

Remarks:

The submitted specimens will be returned at a later date. For questions about the content of this report contact Document Examiner [REDACTED] at [REDACTED]. For questions about the remaining forensic examinations contact Request Coordinator [REDACTED]
[REDACTED] at [REDACTED]. Digital records of the submitted specimens are retained.

I just wanted to let you the evidence in this case has arrived in the Latent Print Operations Unit and has been assigned to me. I will begin processing it shortly for latent prints. If there are any suspects, deadlines, or other case information that may be helpful to me please let me know. Thank you!

REPORT OF EXAMINATION

To: Pittsburgh
Squad 9/JTTF
SA [redacted]

Date: January 6, 2011

Case ID No.: 279B-PG-77757 -¹⁷

Lab No.: 091022006 PO ABA

b6
b7C

Reference: Communication dated October 20, 2009

Your No.:

Title: UNIDENTIFIED POWDER LETTER
SENATOR ARLEN SPECTER-VICTIM
WMD

Date specimens received: October 22, 2009

The items below were examined in the Latent Print Operations Unit:

- Q1 Envelope addressed to Sen. Arlen Specter (1B1, E4336666).
- Q1.1 Stamp removed from Q1 (1B1, E4336666)
- Q2 Page beginning "Arlen Get out of Government;..." (1B1, E4336666)

This report is being issued by the Latent Print Operations Unit.

Results of Examinations:

Two latent prints of value were detected on Q1. No latent prints of value were detected on the remaining specimens.

Automated latent fingerprint searches were conducted on one latent fingerprint, but no identification was effected. The latent fingerprint was added to the Unsolved Latent File (ULF) and you will be advised by a supplemental report if an identification is made.

279B-PG-77757-¹⁷

The remaining latent fingerprint does not meet the necessary criteria for automated fingerprint searches.

Methods:

Items of evidence submitted to the Latent Print Operations Unit for examination may be examined visually, examined with various light sources, and/or processed with chemicals and powders to detect the presence of latent friction ridge prints. The specific sequence of examinations and processes depends upon the nature of the evidence.

Friction ridge print examinations are conducted using the Analysis, Comparison, Evaluation, and Verification methodology (ACE-V), which includes an assessment of the quantity and quality of the information present. The steps of ACE-V are applied to each examination as appropriate.

Analysis is the assessment of a friction ridge print to determine if sufficient reliable details are present to conduct a comparison with another print and to reach an identification conclusion. If these conditions are met, the print is determined to be "of value".

Comparison is the direct side-by-side observation of friction ridge prints of value to determine whether or not the information in two prints is in agreement.

Evaluation is the formulation of a conclusion based on the information gathered during the analysis and comparison of the friction ridge prints.

Conclusions that can be reached are as follows:

- Identification - the determination that there is sufficient quality and quantity of detail in agreement to conclude that two friction ridge prints originated from the same source.
- Exclusion - the determination that there is sufficient quality and quantity of detail in disagreement to conclude that two friction ridge prints did not originate from the same source.
- Inconclusive - the determination that corresponding areas of friction ridge prints are absent and/or unreliable and therefore cannot be identified or excluded.

Verification is the independent application of the analysis, comparison, and evaluation phases of the ACE-V methodology to a friction ridge print by another examiner.

Interpretations:

The presence of a friction ridge print on an item of evidence indicates contact was made between the source and the item of evidence. The presence of a friction ridge print alone does not necessarily indicate the significance of the contact nor the time frame during which the contact occurred.

Due to the many factors involved in the deposition of a friction ridge print, neither the absence of a friction ridge print on evidence nor the exclusion of a friction ridge print with a given source, disassociate that source from having touched the evidence.

Remarks:

b7C**Case ID #:** 279B-PG-77757 (Pending)**Title:** UNIDENTIFIED POWDER LETTER
SENATOR ARLEN SPECTER-VICTIM
WMD**Synopsis:** Request to close investigation and destroy evidence.**Details:** Lab results from the FBI Laboratory were returned to the Pittsburgh office and identified the white powder contained in the envelope sent to Senator Arlen Specter as consistent with a saccharin or sweetener based product similar to the commonly available "Sweet and Low" product.

The letter did not contain language that could be identified as overtly threatening. The only language written in the letter read: "Arlen, Get out of Government; or you will be removed."

In consideration of the facts that the powder enclosed in the letter was identified as a non-hazardous material, no additional such letters have been received in the Senator's office and the United States Postal Inspection Service and the FBI have been unable to develop any information contributing to the identification of the sender of the letter, it is requested that this investigation be closed. Additionally it is ordered that all evidence in this case consisting of items 1B1, 1B2 and 1B3 be destroyed by the Evidence Control Technician.
